AND COMING SHORTLY...

Facilities Value Management
1st Edition 2008
by Gill Smyth and Bernard Williams

How to develop a Facilities policy using formal value management principles and linked with the organisations overall value management plan. Ground-breaking!

Whole-life Economics of Building Services
2nd Edition (A4) 2007
by Malcolm Lay, Bernard Williams and
Ronald Hurst

Measured cost analyses of the Life-cycle Costs of all the building services in four buildings covering the normal range of shapes and sizes. Gives estimating rates and typical quantities in respect of initial installation, life-cycle replacement, maintenance and energy consumption for each component of every service. Also economic commentary explaining why overall costs vary widely from building to building and the effects of DCF on total life-time costs.

Facilities Economics at your fingertips

by Bernard Williams FRICS

The most comprehensive work ever written on this critically important subject

Contains over 850 pages crammed with essential information. graphic presentation and HARD DATA on the COSTS, VALUES and MANAGEMENT of every conceivable aspect of providing and using building and support services

"It is inconceivable that any facilities manager worthy of the title - Board-bound or not - would not have a copy of this learned, practical and highly informative work. Furthermore, having it on the bookshelf will not do: it demands to be open on the desk by day - and by the bedside reading lamp at night."

Facilities Management UK
